SUMMARY

Versatile IT graduate with hands-on experience in software and web development, UI/UX design, system integration, and technical support. Skilled in React.js, TypeScript, Firebase, Flutter, Figma, and Canva, with experience in API integration, testing, troubleshooting, and documentation. Adaptable, proactive, and quick to pick up new tools and technologies, with strong communication skills and a collaborative, detail-oriented approach to any team.

TECHNICAL SKILLS

Development: React.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, PHP, REST APIs, Kotlin, Flutter
Database & Cloud: MySQL, Firebase, Google Cloud Platform (GCP)
Design: Figma, Canva, Adobe Photoshop, UI/UX Design, Social Media & Event Graphics
IT & Systems Support: Hardware/Software Integration & Troubleshooting, System Testing & QA, Basic Networking
Tools & Platforms: Git, GitHub, GoHighLevel, Microsoft Office, Google Workspace

RELEVANT EXPERIENCE

Web Developer Intern — NOLA Web Solutions *February 2026 – July 2026*

- Developed websites and funnels in GoHighLevel (GHL) for client businesses, focusing on page structure, content organization, responsive layouts, and GHL workflow integration.
- Worked with REST APIs, GoHighLevel workflows, database services, and local SMS gateway functionality to support Philippine SMS delivery, testing features end-to-end to verify reliable data flow.

Graphic Designer — Bureau of Information Technology Specialists *2024 – 2025*

- Designed social media posts, announcements, and event graphics for internal and external communications, maintaining consistent visual branding for the organization.
- Partnered with student leadership to translate event concepts into on-brand visual materials under tight turnarounds.

PROJECTS

WEB DEVELOPMENT PROJECTS

- **NOLA Web Solutions** — Built and customized website pages using GoHighLevel, focusing on page structure, service presentation, content organization, and responsive layouts.
- **NOLA SMS Pro** — Developed frontend features for a GoHighLevel-integrated SMS automation platform, shipping SMS configuration and workflow functionality across user, agency, and admin applications.
- **Hoboken Madd Hatter** — Built website pages for a restaurant and nightlife business, organizing menus, dining information, events, and reservations into a cohesive online experience.
- **Podcast Stories** — Created a dedicated website experience for podcast content and storytelling, focusing on content presentation, page structure, and navigation.
- **Terry Watson** — Developed website pages for a professional online presence, showcasing speaking services, background, testimonials, and booking information.
- **Madd Hatter Halloween** & **UFC Fight Night 332** — Created promotional landing pages for restaurant events, presenting event details, schedules, venue information, and ticket access through themed layouts.

SOFTWARE DEVELOPMENT PROJECTS

SafeHito Mobile Application

AI-Based Fungal Detection & Diagnosis System (Capstone Project)

- Developed a mobile application integrated with an AI-powered Raspberry Pi image scanning system for detecting fungal infections in African catfish aquaculture environments.
- Implemented real-time water quality monitoring and environmental tracking features supporting fish health assessment and automated diagnostic workflows.
- Designed an intuitive diagnostic UI/UX for non-technical fish farm operators while contributing to database structure planning, API integration, and overall system architecture.

SmartDose Mobile Application

Automated Medication Dispenser System

- Developed a medication management system with a patient/caregiver mobile application and admin dashboard for managing medications and user activity.
- Integrated Firebase with ESP32-based dispenser hardware to support medication schedules, dispensing records, and real-time system updates.
- Designed intuitive interfaces for medication scheduling, monitoring, and administration, improving accessibility for patients, caregivers, and administrators.

EDUCATION

Bachelor of Science in Information Technology — Pampanga State University *2022 – 2026*

- General Weighted Average (GWA): 1.32
